## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments, see Remarks (page 5, first paragraph), filed 1/23/2006, with respect to claims 1-7 have been fully considered and are persuasive. The rejection of claim 1 and objection of claims 2-7 have been withdrawn.

### ***Drawings***

2. The drawings were received on 1/23/2006. These drawings are approved.

### ***Allowable Subject Matter***

3. Claims 1-7 are allowed.

4. The following is an examiner's statement of reasons for allowance:

The present invention provides a new method of conversion-to-array for creating array configuration data, in which the repetition pitch in case of the maximum number of repetitions may be selected from a plurality of predetermined candidates of the repetition pitch such that the repetition pitch may be optimized and, consequently, the data may be compressed efficiently compared with the conventional method (specification, page 3, lines 1-7).

In particular, the prior art, taken either singly or in combination, does not teach:

- selecting a predetermined number of patterns near a master pattern,... and said master (see independent claim 1);
- selecting the maximum number of repetitions from a plurality of predetermined

candidates of the repetition pitch (see independent claim 2).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
